

Die Cut Mailer

Style: Self Locking
Closure: Yes
Die Cut? Yes
Common Flutes: E / B

Die Cut Mailers are typically used for shipping small to medium sized products.
They have 2 roll over sides that lock in and hold the box together, the lid folds down and two tabs
lock into the front roll overs to close the box. Mailers have limitations to their dimensions,
the depth cannot exceed the width of the box otherwise the roll over panels won't be able to lock in properly.
